Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 34-59 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 4,476,382 to White.

White teaches a method for encoding articles and articles encoded by the method. The method generally involves marking the article with materials capable of emitting X-rays. A source of electromagnet radiation is applied at an appropriate wavelength to detect the presence of the marker. White discloses that the marking materials may be rare earth metals. The reference also discloses that the articles to be marked by the method include tapestries, fibers, currency, etc.

Therefore, for the reasons set forth above, Applicants' claimed invention is deemed to be anticipated, within the meaning of 35 USC 102 in view of the teachings of White.
